Facing 3 Big Ds (divorce, death of her parents, downsized from two jobs) jolted Amy into her journey of personal growth. Surviving what she “wouldn’t wish on her worst enemy” led her to where she is today... passionately speaking and training about the ***absolute importance and power of creating growth environments both personally and professionally.***

The principles of growth are the same in the plant world and the work world. Helping people grasp the importance of that simple truth is at the heart of what Amy desires. Applying it is what she delivers.

Her interactive keynotes and seminars shine the light on how:

- **Raising Awareness—demands self-evaluation**
 - **Communication—improves when connecting occurs first**
 - **Growth— isn’t automatic but produces immediately**
 - **Leadership—means working hardest on changing yourself**
 - **Seeing Blind Spots—requires asking the right questions**
